

Expro uses **Michael Management** to launch global SAP training program and increase utilization of SAP investment.

Company: Expro

Industry: Oil & Gas

SITUATION

UK based Expro International Group, a leading oil & gas services company, was rolling out SAP on a global scale to all its users and was looking for a content partner to enable rapid end user training.

The company needed to create an SAP baseline knowledge for all its users, including basic SAP navigation and reporting skills and standard business transactions in Finance and Supply Chain.

SOLUTION

Expro used MMC's ready-to-go online SAP training, including its hands-on simulation training, to launch a global online training program in a matter of days, relying on MMC's predefined SAP Learning Paths for common SAP roles.

"If we would have done the training internally, it would have required hundreds of instructors and tremendous travel expenses to meet our aggressive go-live schedule - virtually impossible.", said Mike Beech, Head of Business Systems at Expro.

RESULTS

Launched global online SAP training program in a matter of days

Hands-on simulations to teach users how to perform tasks in SAP

Utilized MMC's SAP learning paths to assign the 'right training to the right people'

EXPRO

QUOTE

“MMC gives us the flexibility to offer our employees the training they need, with on-demand coursework that can be completed at virtually any time.”

Mike Beech
